LTD004
ACCESS UNIT TERMINATION DEVICE

DS-021 Issue 02

ZIZTEL

Thank you for your interest in Ziztel – we are a UK based manufacturer of PAGA and Intercom Products. Our products are mainly designed for use in the Hazardous Oil, Gas and Petrochemical industries.

Allows connection for up to three operator access units in a high integrity PAGA alarm and voice broadcast system.

Lightening protection integrated to assure long trouble free service.

Standard RJ45 connectivity to host ZX100 management enables simple installation and maintenance.

 Test / disconnect cable termination enables safe continuity checking without having to disconnect field conductors.

ZIZTEL ZEST LTD004

Space saving, small rack foot print

Rapid fault finding

Rapid service / simplified maintenance

The Ziztel Zest LTD004 termination device is a DIN rail mount terminal assembly which allows direct connection for up to three AP100-01 PAGA operator access units. The LTD004 carries test / disconnect terminals that enable up to 2.5mm² conductors and converts the field cable landed there on to industry standard RJ45 connector enabling use of a RJ45 patch cord.

The patch cord lead provides connection to / from the host ZX100 management unit and therefore enables rapid service.

An auxiliary +48 VDC outlet is provided by TSX which can be used to energise ancillary hardware such as relays or indicators up to a maximum load of 50mA.
