

ZX100-NAS-01

PROGRAMMABLE PAGING CHIME

DS-262 Issue 02

Thank you for your interest in Ziztel - we are a UK based manufacturer of PAGA and Intercom products. Our systems are mainly designed for use in the Hazardous Oil, Gas and Petrochemical industries.

The Ziztel ZX100-NAS-01 is a highly integrated sub microsystem which can be plugged in to a ZX100 based PAGA management processor. The unit allows a wide range of tone signals to be downloaded and played preceding a routine voice broadcast.

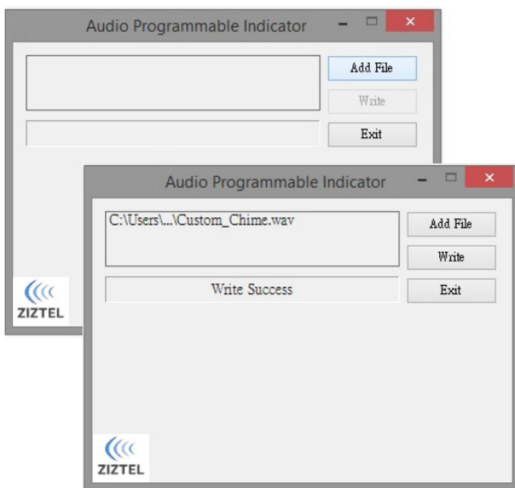

ZIZTEL ZX100-NAS-01 ROUTINE PAGING CHIME

Programmable by WAV file down load – infinite choice of pre announcement chime tones

Modular plug in ‘SLIC’ based – simple easy installation

The ZX100-NAS-01 programmable audio indicator is a versatile non-volatile storage medium which enables the download and retention of a unique project specific routine pre announcement chime tone. The unit is based on a Ziztel ‘SLIC’ style plug in / out module and derives resources from the host ZX100 motherboard. The ZX100-NAS-01 is designed to receive an audio sample in WAV file format enabling an almost infinite range of tones / sounds to be retained and played back prior to a routine broadcast. Programming the ZX100-NAS-01 is implemented by connection to a Windows PC running a simple WAV file down load application. Physical connection between PC and target ZX100-NAS-01 store is by a standard USB cable which is connected to enable file down load. The chime duration can be 0.1 seconds through to 30 seconds long. On board LED indications

provide the engineer with NAS-01 supply / operational status; i.e. supply healthy (green) and chime trigger (yellow).
